Education

Cavite State University – Silang Campus
Bachelor of Science in Computer Science

Silang Cavite, Philippines
2022 – Present

Experience

Freelance

Web Developer (Backend Focused)

Remote

February 2025 – Present

- Developed and deployed a robust RESTful API (Express.js/TypeScript/MongoDB) for e-commerce, including PDF generation and third-party integrations.
- Engineered backend management features (products, orders, users) and implemented secure authentication, collaborating with UI/UX and front-end team.
- Managed API deployment, configured DNS/SMTP, and assisted with front-end integration, participating in regular team meetings.

Freelance

Web Developer (Backend Focused)

Remote

June – September 2024

- Developed and deployed a scalable RESTful API on a serverless platform, leveraging Express.js and MongoDB.
- Delivered a custom web application, streamlining client business processes.
- Worked directly with a front-end developer to integrate and test API endpoints, ensuring reliable data transfer.

Cleaningly

Web Developer Intern

Remote

September – December 2023

- Build and maintain web app features using MERN stack.
- Improved data accuracy for client appointment statistics by resolving an API data integrity issue.
- Accomplished the completion of over 20 tickets.

Projects

SZN Shop (School Project)

October – January 2025

Full Stack Developer

- Created a functional e-commerce website utilizing the MERN stack.
- Contributed to full-stack development, delivering the entire back-end and a significant portion of the front-end, including API integration, within a 3-person team.

Phoenix Hub (School Project)

May – July 2024

Full Stack Developer

- Designed and implemented an online marketplace website utilizing CodeIgniter4 and Bootstrap.
- Served as lead developer within a 3-person team, responsible for determining deliverables, database design, backend implementation and front-end integration.
