EDUCATION

Cavite State University – Silang Campus Expected July 2026
Bachelor of Science in Computer Science

EXPERIENCE

Software Development Intern Hybrid
Sprout Solutions July – September 2025

- Developed **RPA bots** using **Python** to automate payroll variance reporting, reducing manual reconciliation from **hours to seconds**.
- Updated frontend and backend code to support new RPA bots, including database migrations and integrations using **FastAPI**, **PostgreSQL**, and **Azure Durable Functions**.
- Pioneered RPA Hub frontend revamp using **Vue.js**, **TypeScript**, and **Tailwind CSS**, implementing reusable, strongly typed components based on real backend data models and wireframes.

Full Stack Developer Remote
Freelance June – September 2024 & February – April 2025

- Developed and deployed **2 full-stack applications**, serving as the **sole backend developer** using **Express.js**, **TypeScript**, and **MongoDB**, while contributing to **Next.js** frontends.
- Built an automotive service management platform used by **10+ employees since 2024**, enabling customer service bookings and supporting daily business operations.
- Implemented secure authentication and **role-based access control (RBAC)** with super admin, admin, and user roles using JWT, Google OAuth2, and secure cookies.
- Built an **internal admin workflow** where the super admin assigns quotations and invoices to admins, generate formal documents within the system, and send them directly to clients via email.

Web Developer Intern Remote
Cleaningly September – December 2023

- Built and maintained **Next.js** and **Express.js** applications using **JavaScript** and **MongoDB**, delivering **20+ production tickets** over 3 months.
- Pioneered an **email template builder** with dynamic placeholder logic, enabling clients to generate templates automatically instead of manually configuring each field.
- Earned an offer to return as a part-time developer starting January 2024, based on performance during the internship.

PROJECTS

KeyBud *(www.keybud.jomkv.tech)* Repositories: frontend, backend
Personal Project

- Built and deployed a social media app for keyboard enthusiasts, serving **10+ users** with secure OAuth2 authentication and real-time messaging using **React.js**, **Express.js**, **MongoDB**, **TypeScript**, and **Bootstrap**.

SZN Shop Repositories: frontend, backend
Team Project (Lead)

- Led a 3-member team in building a full-stack e-commerce prototype for a clothing brand, implementing the entire backend and integrating core features into the frontend, including authentication, product customization, and order handling using **React.js**, **TypeScript**, **Express.js**, and **MongoDB**.

Phoenix Hub Repository: frontend/backend
Team Project (Lead)

- Led a 3-member team in building a proof-of-concept online marketplace featuring **11 CVSU-Silang organizations**, developing core marketplace and admin features, secure student-only registration, and **PayMongo** payment integration using **CodeIgniter4**, **PHP**, **MySQL**, and **Bootstrap**.

SKILLS

Languages and Frameworks: Javascript, Typescript, Python, PHP, Express.js, NestJS, FastAPI, CodeIgniter4, React.js, Next.js, Vue.js
Databases: MySQL, PostgreSQL, MongoDB
Libraries and Tools: Tailwind CSS, Bootstrap, Material UI, shadcn, Azure Durable Functions, PayMongo, Git, Vercel
