EDUCATION

Cavite State University – Silang Campus Expected July 2026
Bachelor of Science in Computer Science

EXPERIENCE

Software Development Intern Hybrid
Sprout Solutions July – September 2025

- Developed Python-based RPA bots, reducing payroll variance reconciliation from hours to seconds.
- Integrated RPA bots across the stack, updating database enums, creating migrations, and exposing them on the frontend.
- Pioneered development of RPA Hub v2, building reusable components with Vue.js, TypeScript, and Tailwind CSS.

Full Stack Developer Remote
Freelance June 2024 - April 2025

- Primary backend developer in a two-person team, collaborating with a frontend developer and providing API documentations for integration.
- Designed and deployed 2 RESTful APIs using Node.js, Express, TypeScript, MongoDB, and Docker.
- Built an automotive service platform used by 10+ daily users, streamlining booking and admin workflows.
- Implemented secure authentication using JWT, Google OAuth2, and secure cookies, managing deployments on Vercel and Render.

Web Developer Intern Remote
Cleaningly September – December 2023

- Developed and maintained full-stack applications using Node.js, Express, Next.js, and MongoDB, resolving 20+ production tickets within 3 months.
- Integrated API endpoints into frontend features, implementing dynamic UI components and client-side logic using Next.js.
- Received an offer to return as a part-time developer based on internship performance.

PROJECTS

KeyBud *(link)* Repositories: frontend, backend
Personal Project

- Built and deployed a social platform for keyboard enthusiasts using React, Express, MongoDB, and TypeScript.
- Implemented authentication using OAuth2 and real-time messaging using WebSockets.
- Currently developing KeyBud v2, using AWS S3 and CDN media delivery.

SZN Shop *(link)* Repositories: frontend, backend
Team Project (Lead)

- Led development of a full-stack e-commerce prototype using React, TypeScript, Express, and MongoDB.
- Developed the backend, implementing authentication, product management, and order processing, while supporting frontend integrations.

Phoenix Hub Repositories: frontend/backend
Team Project (Lead)

- Led development of a multi-organization marketplace for 11 CvSU organizations using PHP, CodeIgniter4, and MySQL.
- Utilized CodeIgniter Shield for authentication and PayMongo for payment processing.

SKILLS

Languages and Frameworks: Python, TypeScript, JavaScript, Node.js, Express, FastAPI, PHP, CodeIgniter4, React.js, Next.js, Vue.js
Databases: PostgreSQL, MySQL, MongoDB
Libraries and Tools: AWS S3, AWS CloudFront, Azure Durable Functions, Docker, Git, Tailwind CSS, Bootstrap, Material UI, PayMongo, Vercel, Render
